

Classic and Vintage Cars Restoration Services

Company background

Founded in 1990, Le Riche Automobile Restorers (C.I.) Ltd is a leading vintage and classic car engineering company. Our restoration work has received international recognition with awards for our craftsmanship received from prestigious global concours events such as Villa D'Este in Italy and Pebble Beach in California, to name but a few.

LOCATION

Based on the beautiful Island of Jersey, a British Channel Island, we are conveniently located at the gateway to Europe. Jersey is an independent British Crown Dependency which is self governed, with judicial independence and importantly is a tax free. No taxes apply to our services, the expert labour or the parts purchased in the restoration of client cars. Why not visit us to view your project, you are most welcome and be our guest.

Classic and Vintage Cars, THE ADVENT OF A NEW ASSET CLASS.

The vintage and classic car market is increasingly regarded as a new form of alternative investment. No longer dominated by specialists and collectors, we have witnessed more enthusiastic investors looking to diversify their wealth with rare and historic cars and also enjoy them for what they represent. Prices continue to rise as more investor enthusiasts come into this market from the powerful emerging new economies. The finite nature of the supply of these rare cars has seen prices rise steadily. At Le Riche Automobile we can ensure you have the expertise at hand to access this new asset class.
